

The Only Place on Earth with Two Annual Vanilla Harvests

Ugandan vanilla ripens in the best growing conditions: on the equator. Combined with fertile soil and two rainy seasons, Uganda is the only place with two harvest seasons.

Ugandan vanilla beans and extracts have a **higher-than-average vanillin content**, leading to a bold, aromatic product with subtle notes of cacao and fruit.

Nuanced Flavor Profile

- High vanillin, with levels up to 4.5%
- Notes of cacao and fruit, at once bold and floral

Cultivar

- *Vanilla planifolia*, like Madagascar

Steady Production

- 2023 exports of 267 MT

Harvest Seasons
